University of Dundee

Module Specification and Supporting Information

Applicability	Students taking the module from academic year 2025-2026

Section 1: Module specification	
Heading	**Details**
1.1 Module title	Honours Project
1.2 Module code	DI40001
1.3 Scottish Credit and Qualifications Framework (SCQF) level and credits	SCQF level 10, 45 SCQF credits, 22.5 ECTS credits.
1.4 Aims	The aim of the project is to give the student experience in carrying out an independent project which is the culmination of their degree programme.
1.5 Indicative content	There are 8 workshops covering: • Project Management • Risk Assessment • Ethics • The Use of Artificial Intelligence • Research Integrity • Creating a Mid-Term Report • Structure and synthesis in report writing • Creating the final project deliverables
1.6 Intended learning outcomes	**Knowledge** • This will depend upon the particular project undertaken. **Subject-specific practical and intellectual skills and attributes** • Experience in researching, analysing, specifying, implementing, testing and evaluating their own project. **Transferrable, employability and enterprise skills and attributes** • Independent organisation of work, project planning, time management, report writing, project meetings, communication and presentation skills.
1.7 Assessment strategy	Assessment focusses on the background and requirements of the project, design, implementation or other technical work, evaluation or results, the quality of the project report and appendices, the student's demonstration and project management. These are assessed from the written report/appendices and the project demonstration.
1.8 Assessment types and weighting	The intended learning outcomes of the module are assessed by project portfolio and demonstration.

Assessment type	Weighting (%)
Coursework	100%

Written exams	0%
Practical exams	0%

The intended learning outcomes of the module are assessed by 100% coursework. The assessment comprises the following:

MAB001 10% - Interim Report
MAB002 70% - Final Report
MAB003 20% - Online Presentation with Q&A (note 10 minute presentation and 5 minutes Q&A).

Regular feedback on progress is given by the project supervisor.

Qualification thresholds: There are no qualification thresholds other than achieving a standard D3 pass or above, based on a weighted average of all assessment grades combined.

1.9 Teaching and learning

The student undertakes individual project work. Regular meetings are held with an academic supervisor. These meetings are set at a duration of 30 minutes per week

1.10 Indicative student contact hours and the expected amount of independent study

Learning activity	**Indicative number of hours (and percentage of total learning time)**
Scheduled contact time: lectures, tutorials, practical work and field work.	28 hours
Approximate breakdown of scheduled contact time	
Supervisory meetings	*12 hours*
Timetabled Workshops	*16*
Time in guided independent study including the completion of assessment tasks	422 hours (93.78%)
Time on placement relevant to the module	0 hours (0%)

1.11 Teaching staff

The module lead coordinates the module.

Supervisors are normally academic staff who have taught upon the DIICSU programme. If any other staff are to take the role of honours project supervisors, they will be approved by the DIICSU staffing and resources committee.

Academic staff can normally only supervise a maximum of 8 honours project students in an academic year.

The distribution of honours project supervision is 1/3 UoD and 2/3 CSU split for all programs.

1.12 Mode of study

Mode of study	Full-time.
Mode of attendance	Face-to-face and online.

	Location of attendance for face-to-face teaching	DIICSU
1.13 Location(s) for the delivery of teaching	All face-to-face teaching takes place at DIICSU, some supervisors may be based at UoD so they will hold online supervisory meetings.	
1.14 When delivered	Over semester 1 and 2 (once per academic year)	
1.15 Equality and diversity	The University is committed to attracting and retaining students from under-represented groups and this module will make adjustments where it is reasonably possible to allow equality of opportunity for all students irrespective of age, disability, gender, race, religion or belief or sexual orientation. Contact SSE@dundee.ac.uk for more information.	
1.16 Pre-requisites or entry requirements	360 SCQF credits, including 120 at SCQF level 9 (or equivalent)	
1.17 Co-requisites	None.	
1.18 Anti-requisites	None.	
1.19 Student numbers	No constraints – full cohort is 300 students	

Section 2: Responsibilities and contacts	
Heading	**Details**
2.1 Lead School	School of Science and Engineering.
2.2 Lead discipline	DIICSU – this is a module common to all DIICSU programmes
2.3 Collaborating Schools (where relevant)	N/A.
2.4 Module leader	Prof. Karen Petrie School of Science and Engineering k.petrie@dundee.ac.uk
2.5 Lead administrator for the module	Ssen-Education-Computing@dundee.ac.uk

Section 3: Module details (information for internal use for quality assurance and management)	
Heading	**Details**
3.1 Rationale for the module	Compulsory component of all DIICSU programmes.
3.2 First student intake	Academic year 2025-2026
3.3 External organisations associated with the module	N/A.
3.4 Reference points for quality and academic standards	The key benchmarks used in the design of the module are the SCQF, QAA project benchmark and the Chinese Ministry of Education Project Guidelines.

3.5 Teaching quality and staff development opportunities	This module is taught by staff who have experience of teaching similar or related modules. Knowledge within the subject area will be maintained through links with research, e.g. conference attendance, and industry partners, e.g. Industrial Advisory Board. Students complete feedback on an annual basis, and this is considered in the computing course review, which takes place at the end of the academic year. This ensures that modules are taught to a high standard. Staff are encouraged to attend any relevant training and development opportunities, e.g. provided by the LLC or by OPD. Annual peer review of staff will further ensure that professional development opportunities can be provided for teaching related activities.
3.6 Distance or blended learning	N/A.
3.7 Placements	N/A.
3.8 Inclusive nature of the curriculum and its delivery	All staff are committed to providing access to a full teaching and learning program for all students, taking account of all protected characteristics under the Equality Act 2010. Specific adjustments can be arranged for students to meet individual needs. Further details of the University's provision for students with disabilities is available at http://www.dundee.ac.uk/disabilityservices/.
3.9 Teaching accommodation	Adequate laboratory space is needed for individual student work. Some students require to use particular software which must be installed on a particular computer.
3.10 Learning and assessment resources	1. A reading list will be created, and made available to students in accordance with the university policy on reading lists. This will outline any relevant material that is available in the Library and Learning Centre. Any students requiring further support for academic skills or digital literacy will be encouraged to attend appropriate sessions run by Academic Skills Centre. 2. Project reports will be submitted via Turnitin through My Dundee. 3. Online project demonstrations will be held via Microsoft Teams and recorded.
3.11 Other resources including any specialist equipment or facilities	When projects are proposed, supervisors can request up to 900 CNY from DIICSU for materials.
3.12 Additional costs for students	None.
3.13 Teaching allocations	N/A.

Section 4: University management information (to be completed by the University's Quality and Academic Standards office)	
Heading	**Details**
